Dear Linda Sterling,

As a Computer-Science Major, I am excited to apply for the Web Developer position for the Sustainability Engagement Institute. My current employment with our Ridgeway Dining Hall as a Student Manager has shown me the amount of food waste and work that needs to be done to ensure we keep our practices sustainable.

Alongside my major-related coursework, I have many projects that I learn from:

- Personal website showcasing my basic projects, profile, and other information about me ([msws.xyz](https://msws.xyz)).
- Xenforo Forums for the EdgeGamers Community ([edgegamers.com](https://edgegamers.com)).
- Grafana statistics tracking ([msws.xyz/stats](https://msws.xyz/stats)).

With my familiarity in Git (and GitHub + GitLab), dedication to quality clean code, and understanding of the softwares that go into web development, I believe I can exceed the requirements laid out for this position. My work experience alongside my years of working with a gaming community has shown me how important team-work and sustainability is.

I would be thrilled to assist in spreading the importance of sustainability in all areas of our university. I look forward to speaking with you.

Sincerely,  
Isaac Boaz
