Experience

- **Nordstrom** **Seattle, WA**
04/2025 – Present
Software Engineer
 - Configured Kubernetes, Terraform, and GitHub infrastructure across multiple application namespaces.
 - Overhauled Actions workflows to Isaac K. Boaz automate development, staging, and production pipelines.
 - Added NewRelic metrics, logging, and tooling to Java and Python applications.
 - Optimized engineering workflows with Claude Code and Agentic Tooling.
 - **Trimble** **Seattle, WA**
06/2024 – 09/2024
Software Engineering Intern
 - Contributed to Tierceron, a Go-based secrets manager, by adding Docker image build support to its CLI.
 - Resolved a four-year-old bug affecting thousands of clients in a JSX web application within four days.
 - Automated update and release pipelines with Bash and Azure DevOps for CI/CD.
 - **Western Washington University** **Bellingham, WA**
01/2024 – 06/2024
Computer Science Teaching Assistant
 - Designed unit tests to ensure consistent and reliable grading of student work.
 - Provided feedback and grades on assignments, projects, and quizzes.
 - Authored $\LaTeX$ documents for homework assignments and answer sheets.
-

Projects

- **EdgeGamers Organization** <https://edgegamers.com>
2022 – 2025
Software Engineer, Volunteer
 - Developed and maintained multiple projects, including Java & C# server plugins.
 - Coordinated a 26-member team to ensure timely completion of tasks and resolution of issues.
 - Documented policies, procedures, and systems to support onboarding and training of new members.
 - Maintained servers with automated production and development pipelines using Docker, GitLab and GitHub.
 - **Trouble in Terrorist Town** <https://kboaz.dev/gh/TTT>
 - Built a C# TTT plugin from scratch with a focus on modularity and multi-platform support.
 - Abstracted platform-specific implementation and validated behavior with unit testing.
 - Developed a player and gameplay statistics website using SvelteKit with a Bun and PostgreSQL backend.
-

Education

- **Western Washington University** **Bellingham, WA**
2022 – 2024
College of Science and Engineering, B.S. Computer Science
-

Technical Skills

Languages

Proficient: C#, Java, JavaScript, TypeScript, SQL

Familiar: C, Go, Python, Svelte, Node.js, Bun

DevOps Tools: AWS, Cloudflare, Docker, Kubernetes, Git, CI/CD with GitHub; GitLab; and Azure

Development: Object-Oriented; Functional; and Dynamic Programming, Unit; Integration; and End to End Testing, REST/CRUD APIs, Redis
