Experience

- **Trimble** **Seattle, WA**
Software Engineering Intern 06/2024 – 09/2024
 - Contributed to [Tierceron](#), a Go-based secrets manager, by adding Docker image build support within its CLI.
 - Resolved a four-year-old bug affecting thousands of clients in a JSX web application within four days.
 - Automated update and release pipelines with Bash and Azure DevOps for CI/CD.
 - Collaborated with a Scrum team to prioritize tasks and address blockers.
 - **Western Washington University** **Bellingham, WA**
Computer Science Teaching Assistant 01/2024 – 06/2024
 - Designed unit tests to ensure consistent and reliable grading of student work.
 - Provided feedback and grades on assignments, projects, and quizzes.
 - Authored $\LaTeX$ documents for homework assignments and answer sheets.
-

Projects

- **EdgeGamers Organization** <https://edgegamers.com>
Software Engineer, Volunteer 2022 – 2025
 - Developed and maintained multiple projects, including Java & C# server plugins.
 - Coordinated a 26-member team to ensure timely completion of tasks and resolution of issues.
 - Documented policies, procedures, and systems to support onboarding and training of new members.
 - Maintained servers with automated production and development pipelines using Docker, GitLab and GitHub.
 - **Trouble in Terrorist Town** <https://kboaz.dev/gh/TTT>
 - Built a C# TTT plugin from scratch with a focus on modularity and multi-platform support.
 - Abstracted platform-specific implementation and validated behavior with unit testing.
 - Automated build, test, and release pipelines using GitHub Actions following [SemVer 2.0.0](#).
 - Developed a player and gameplay statistics website using SvelteKit with a Bun and PostgreSQL backend.
 - **Homelab** <https://kboaz.dev/gh/Homelab>
 - Designed, deployed, and maintained a mini homelab server for infrastructure experimentation.
 - Deployed a Debian server with automated daily Restic backups following the 3-2-1 backup strategy.
 - Configured Cloudflare Zero Trust Access for public tunnel exposure and private SSH access via OAuth.
 - Setup statistic and performance monitoring with Prometheus and Grafana.
-

Education

- **Western Washington University** **Bellingham, WA**
College of Science and Engineering, B.S. Computer Science 2022 – 2024
 - Minor in Mathematics.
 - Graduated December 2024.
-

Technical Skills

Languages:

Proficient: C#, Java, JavaScript, TypeScript, SQL

Familiar: C, Go, Python

DevOps Tools: AWS, Cloudflare, Docker, Git, CI/CD with GitHub, GitLab CI, Azure DevOps

Development: Object-Oriented, Functional, and Dynamic Programming; Unit & Integration Testing
